FIRST AID

When **someone** has an accident, you have to help him or her. There's always **something** you can do to help. There are different steps that you should follow with different accidents. Here you will learn about first aid for a cut.

Cut

1 First, you should cover the cut. You should use a clean cloth or towel. You must press down because this will stop the blood. But you shouldn't press too hard.

2 Next, you must clean the cut. This sometimes hurts, so you should use clean water on a clean cloth and try to be careful. You should clean the cut slowly.

3 Now, you must take a new cloth. You have to dry the cut. Move around the cut to dry it.

4 Finally, you should put a band aid on the cut. Don't forget to put the dirty cloths in the trash!

5 If the cut is on your head, you can get a headache. In that case, you should see your doctor.
